COMMAND-LINE INTERFACE: AWS CLI ESSENTIALS

WHAT IS AWS CLI

AWS CLI (Command Line Interface) is a tool which is provided by Amazon Web Services that lets you control and manage AWS services using commands in your terminal instead of the web console.

HOW TO INSTALL AWS CLI ON UBUNTU

1. apt update
2. apt install unzip curl -y
3. curl "https://awscli.amazonaws.com/awscli-exe-linux-x86_64.zip" -o "awscliv2.zip"
4. unzip awscliv2.zip
5. sudo ./aws/install

CONFIGURE AWS CLI ON UBUNTU

1.create a access key and secret key on aws

2.aws configure

1. Access_key
2. Secret_key
3. region

3.aws s3 ls

WHAT IS NAMED PROFILES

A Named Profile in AWS CLI allows you to store multiple AWS credentials and switch between them easily.

1. aws configure --profile dev
   access_key:
   secret_keys:

2. aws configure --profile prod
   access_key:
   secret_key:

3. **How to list all profiles**
   aws configure list-profiles

4. **Run command with specific profile**
   aws s3 ls --profile dev

WORKING WITH S3 BUCKET

1. **How to list all buckets**
   aws s3 ls

2. **How to create a bucket**
   aws s3 mb s3://amazon-s3-bucket

3. **how to copy the files from local to s3 bucket**
   aws s3 cp file.txt s3://amazon-s3-bucket/

4. **how to copy files from s3 bucket to local**
   aws s3 cp s3://amazon-s3-bucket/file.txt /home/ubuntu/

5. **how to delete the existing buckets**
   aws s3 rb s3://amazon-s3-bucket

6. **How to list files inside the buckets**
   aws s3 ls s3://amazon-s3-bucket/

7. **How to upload entire folder into s3 bucket**
   aws s3 sync myfolder s3://amazon-s3-bucket/myfolder

WORKING WITH EC2 INSTANCE

1.How to launch ec2 instance

```
aws ec2 run-instances \
--image-id ami-0abcdef12345 \
--count 1 \
--instance-type t3.micro \
--key-name ubuntu \
--security-group-ids sg-123456 \
--subnet-id subnet-123456
```

Note:

Define the valid values while creating the instance

1. key_pair
2. 2.security group
3. 3.ami_id

2.How to list instances

1. aws ec2 describe-instances

3.How to start EC2 instance

1. aws ec2 start-instances --instance-ids i-1234567890abcdef0

4.How to stop EC2 instance

1. aws ec2 stop-instances --instance-ids i-1234567890abcdef0

5.How to terminate EC2 instance

1. aws ec2 terminate-instances --instance-ids i-1234567890abcdef0

6.How to create a key-pair

2. aws ec2 create-key-pair --key-name my-key --query 'KeyMaterial' --output text > my-key.pem
3. chmod 400 my-key.pem

CREATING USER USING AWS CLI

1.create only user

1. aws iam create-user --user-name mayur

2.create user using id-password

1. aws iam create-login-profile \
   --user-name mayur \
   --password "MyStrongPassword@123" \
   --password-reset-required

3.How to check all user

1. aws iam list-users

4.How to attach policy to a user

1. aws iam attach-user-policy --user-name mayur --policy-arn arn:aws:iam::aws:policy/AdministratorAccess

---
