AUTOMATION AND DATA HANDLING IN LINUX

INTRODUCTION TO SEARCH AND FILTER UTILITIES

1.FIND

The find command is used to search files and directories in the system based on different conditions.

Syntax –> find (path) (options) (attributes)

1.Path ----------> where to find file (/ or /etc or /home)

2.Options ------> filtering data with options

- 1.name
- 2.size
- 3.perm
- 4.username
- 5.groupname
- 6.GID
- 7.UID
- 8.mtime (modification) / atime / ctime

3.attributes ---> action to perform on matching result

CLOUDBLITZ

EXAMPLES

1.Create Some Files

1.echo “hello” > /etc/cloud.txt
2.ls /etc/cloud.txt
3. echo “hello” > /mnt/cloud.txt
3.ls /mnt/cloud.txt

1.Search file by name

find / -name cloud.txt

2.Search a file by size

find / -size 16M

3.Search a file by size more than 100M

1.find /etc -size +100M

2.du -sh <filename>

4.Search a file by size less than 10M

find /etc -size -10M

5.Search a file by permission (777)

find / -perm 777

6.Search a file by permission (600)

find / -perm 600

7.Search a file by modify time (last past 2 days)

find / -mtime -2

8.Search the files of user

find / -user mayur

9.Search specific files of user

find /home/mayur -type f -user mayur

10.Search by Group

1.touch /home/mayur/testfile

2.chgrp tech /home/mayur/testfile

3.find / -group tech

11.Search only files

find / -type f

12.Search only directories

find / -type d

13.Find only Empty files

find / -empty

CLOUDBLITZ

2.grep

grep is a search utility used to search a specific word into the file

Syntax: - grep <options> <word> <filename>

EXAMPLES:

1.To find out a word

grep cat sample.txt

2.Case-insensitive search

grep -i cat sample.txt

3. Shows how many lines contain "cat"

grep -c cat sample.txt

4.To show the line number with word

grep -n cat sample.txt

5.To find the multiple words in the file

egrep “cat|dog” sample.txt

6.Match only exact word

grep -w cat sample.txt

7.To show case insensitive with line number

grep -ni cat sample.txt

CLOUDBLITZ

Note:

1. -i ----------> ignore case
2. -n ----------> line numbers
3. -c ----------> count
4. -r ----------> recursive
5. -w ----------> exact word
